

Brief Tarot Lesson – Correspondences

Correspondences represent a relationship/bridge between two levels of existence. In the ancient world, all things were seen as connected. The natural world is connected to the spiritual world. Correspondences are used in philosophy, alchemy and magical practices.

In Tarot we use correspondences as a means to better understand the card. Correspondences provide you the tools to understand the world in which Tarot works in.

The Four Correspondences

Element, Number, Astrology and Kabbalah are the cornerstones to the correspondences.

For example, the Four suits are associated with the four elements.

Wands	Fire
Swords	Air
Cups	Water
Pentacles	Earth

We will use the 2 of Swords as an example and explore the four correspondences
